

Open Social powers 1000+ communities on a mission.

What's your mission?

Introducing Open Social

A community solution that connects your members, promotes knowledge sharing and enables innovation with no interruptions.

- ✓ Providing you with a highly engaging community platform
- ✓ Adapting software to your organization with the extensions marketplace
- ✓ Ensuring your community health and growth with our services

Company Overview

We are GoalGorilla N.V.; an award-winning digital consultancy from Amsterdam. We're a 25 person team that shares countless years of experience in shipping software, online marketing, UX Design, and more.

open social

Our product Open Social is open-source community software that enables stakeholders to engage in a secure online environment. It's built on top of the Drupal 8, a framework for ambitious digital experiences with tens of thousands of contributors worldwide.

We are launching THX; a project inspired by the Open Social project to solve engagement challenges experienced by social technologies using blockchain technology.

Product Overview

Open Social has an **enterprise edition** that offers customized design and development. This includes support, maintenance, version updates, and new features.

A marketplace for extensions which organizations use to extend their community software. These include Google Translate, Single Sign-On, Resource Library, Crowd Innovation, and more.

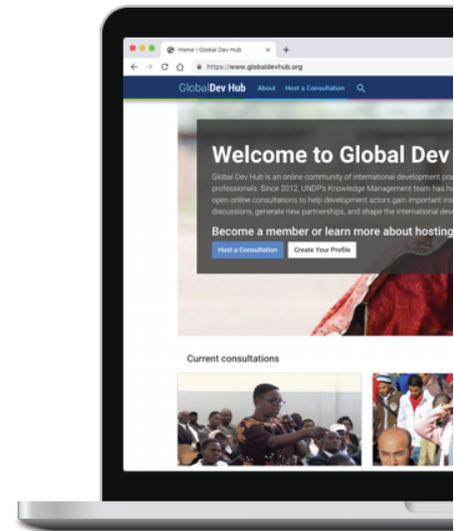

Our team of experts offers **various services** for community consultancy (inc. community management, training, and marketing), community security, and community customizations that include development, UI/UX design, and testing.

Open Social is a great fit for UN projects

Early versions of Open Social's software stem from the award-winning Greenpeace Greenwire Project for Greenpeace International.

Connect people. Change the world.

- ✓ We enable effective internal communication among members
- ✓ We help communities share valuable knowledge and growth
- ✓ We provide a space where skills are put into action

U.N. and Open Social

GoalGorilla and the UNDP worked together on building various social and knowledge platforms as:

- ✓ Global Partnership for Effective Development Cooperation Knowledge Platform
- ✓ Global Knowledge Portal on Youth People's Participation in Peacebuilding
- ✓ Connecting Business Initiative Global portal
- ✓ Global Knowledge Portal on SDG 16
- ✓ SDG Philanthropy Platform Country Ecosystem
- ✓ South-South Global Thinkers platform
- ✓ Public Dialogues / Global Dev Hub

Currently, there are over 1000 organizations running their communities on Open Social, some that include upwards of 100.000 users.

” Sending over 50.000 invites to users of various UN legacy platforms was a crucial moment. It was great to see double figure sign-up rates. Together with Open Social, we made the first consultation a success.
